Dhanmondi, Dhaka 1205

Dhaka, Bangladesh

Professional Summary

Computer Science graduate with over 2 years of combined professional and project experience in software development, web application engineering, data processing, and machine learning solutions. Experienced in building, deploying, and maintaining production-ready applications, integrating REST APIs, managing databases, automating workflows, and delivering business-focused technical solutions. Strong problem-solver with hands-on experience across frontend, backend, data, deployment, debugging, and cross-functional collaboration.

Education

BRAC University

Bachelor of Science (BSc) in Computer Science and Engineering

2021 - 2025

Mastermind English Medium School

A Levels

2020

Mastermind English Medium School

O Levels

2018

Work Experience

TimenowIT | Full Stack Developer

Jun 2025 - Feb 2026

Dhaka, Bangladesh

- Developed and maintained production-ready web applications and tailored web features, improving client-facing digital solutions through responsive frontend development and backend integration.
- Built mobile-friendly and cross-browser compatible interfaces, improving usability and accessibility across desktop and mobile users.
- Integrated REST APIs and backend services to streamline application data flow, user interactions, and dynamic content delivery.
- Supported deployment, debugging, and production issue resolution by using Git-based workflows, environment configuration, and structured troubleshooting.

Hubfluence Digital | Web Developer

Jan 2026 - Mar 2026

Remote

- Built and launched a company website using Vue 3, Vite, and reusable component architecture, improving maintainability and responsive user experience.
- Integrated Strapi REST API endpoints and database-backed contact form workflows, enabling structured content management and customer submission tracking.
- Configured Cross-Origin Resource Sharing (CORS), production environment variables, and Render deployment settings, ensuring stable frontend-backend communication.
- Resolved frontend and backend deployment issues through testing, debugging, and production troubleshooting, improving application stability.

Cleverlyy | Junior Data Engineer

Mar 2024 - Apr 2025

Dhaka, Bangladesh

- Automated recurring reporting workflows, reducing manual effort by approximately 30 percent through Python-based data processing and structured reporting logic.
- Performed data quality checks, cleansing, and preprocessing using Python, Pandas, NumPy, SQL, and Excel, improving reporting accuracy and consistency.
- Produced weekly and ad-hoc dashboards, summaries, and analytical reports to support stakeholder decision-making and operational visibility.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, SQL, Java, C++, C

Frontend Technologies: Vue.js, React.js, Next.js, React Native, Vite, Tailwind CSS, HTML5, CSS3

Backend Technologies: Node.js, FastAPI, Strapi, REST APIs, API Integration

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Data and Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow, Data Preprocessing, Model Evaluation

Business Intelligence and Visualization: Power BI, Matplotlib, Seaborn, Excel

Tools and Platforms: Git, GitHub, Render, Postman, Cloud Deployment, Environment Variables

Projects

Artificial Intelligence Powered Intelligent Security and Surveillance System

Python, FastAPI, React, MongoDB, YOLOv11, InsightFace, OpenCV

- Built a full-stack AI surveillance system with real-time face detection, recognition, re-identification, restricted-zone monitoring, and automated email alerts.
- Integrated frontend, backend, database, and computer vision components into a unified application for real-time monitoring and intelligent event detection.

Cardiovascular Disease Prediction System

Python, Scikit-learn, TensorFlow

- Developed a supervised learning pipeline using clinical indicators, feature engineering, model training, and hyperparameter tuning to achieve approximately 87 percent accuracy.

Flight Delay Prediction System

Python, SQL, Pandas, Power BI

- Analyzed aviation datasets to identify delay factors and built predictive models with reporting dashboards, achieving approximately 82 percent validation accuracy.

Publication

Sustainable Precision Agriculture: Autonomous Soil Sensing and Sapling Management | 2025

- Designed an AI and IoT-based soil monitoring and plant disease detection system using Raspberry Pi, Arduino, sensors, motor control, and YOLO-based object detection.
- Created a Soil Damage Level scoring method with data logging and actionable alerts to support precision agriculture and environmental monitoring.

Certifications

- Generative AI Fundamentals - IBM (Coursera), November 2024
- Machine Learning with Python - IBM (Coursera), December 2024
- SQL for Data Science - University of California, Davis (Coursera), January 2024
- Full-Stack Web Development - Programming Hero, March 2024

Core Competencies

Full Stack Software Development | Frontend Development | Backend Development | REST API Design and Integration | Database Design and Management | Cloud Deployment and Hosting | Software Architecture and System Design | Data Analysis and Reporting | Machine Learning and Artificial Intelligence | Version Control and Collaboration | Performance Optimization | Problem Solving and Troubleshooting | Technical Documentation | Cross-Functional Team Collaboration | Agile Development Practices
